

Delivery information

We accept: 16, 24 and 32 Bit .wav, .aiff and .aif files; at 44.1, 48, 88.2, 96, 176.4 and 192kHz; DSD 2.8; and 5.6MHz. 1/4" and 1/2" tape is accepted by special arrangement.

Files should be uncompressed and include only the most essential stereo processing. If you have "demo mastered" versions that can help us achieve your level/sound vision more easily, please send/bring them.

To help us make your music great, think about these things:

- » Name all the tracks properly e.g. "01 The First Great Song.wav" and please not: "thesongMix32finalmaybe.wav"
- » Tell us the important information e.g. band name, album name etc. These details might not be self-evident and they can really help us
- » If you are unsure about something, don't guess; contact us at info@chartmakers.fi and we'll give you the info you need to get the job done

Before the session, please provide:

- » The label copy, including a track list with track titles and the song order, ISRC codes for all the tracks, and production/catalogue numbers
- » Any additional information, such as changes to be made, fades, clicks, pops or hiss to be removed
- » Your invoice address and VAT number
- » Postal address/addresses for the master and reference CD
- » The name of the factory where your CD will be pressed, and the delivery date
- » Your contact person and phone number
- » The delivery format of the master

Note: Please check that track titles on the label copy correspond to the name of the mix files.

You can email this information before the session to info@chartmakers.fi
