

Delivery information

We accept 16, 24 and 32 Bit .wav .aiff and .aif files at 44.1, 48, 88.2, 96, 176.4, 192kHz, DSD 2.8 and 5.6MHz. Also 1/4” and 1/2” tape are possible. The files should be uncompressed and only have the most necessary stereo processing. If you have some “Demo-mastered” versions that can help us achieve your level/sound vision easier, please send/bring them as well.

To make things great, think about these things:

- » Name all the tracks properly (Example: *01 The First Great Song.wav* not: *thesongMix32maybe.wav*)
- » Add information including: *The Bands name, The Albums name etc.* (All info that might seem unnecessary, will probably help us)
- » If you are unsure about something, don't rely on hear-say, instead contact us at: **info@chartmakers.fi** and we'll provide all the info you'll need to get the job done.

Before The Session:

- » A label copy including a track-list with track titles and song order, ISRC-codes for all the tracks, Production or Catalogue numbers
- » Any additional information, such as changes to be made, fades, clicks, pops or hiss to be removed
- » Your invoice address and VAT Reg. number
- » Addresses for the master and reference CD
- » The name of the factory where your CD will be pressed, and the delivery date
- » Your contact person and phone number
- » The delivery format of the master.

Please check that track titles on the label copy corresponds to the name of the mix files. You can email this information before the session to **info@chartmakers.fi**
